NOT MUCH KNOWN-SOME (UNKNOWN AMOUNT) DUMPING OF AMMONIUM SULFIDE and THIOSULFATE HAS OCCURRED in an underground tank. The LOCAL HEALTH district has supposedly been out there to check it out. The waste comes from KERLEY CHEMICAL Co. (KENNEWICK). There is now a "NO DUMPING" sign posted next to the tank. AS sketch shows, drainage is toward a single well across the street and several wells serving mobile homes about 1/2 mile to the south. NO contamination problems HAVE COME TO ANYONES attention. We do not know if the tank leaks or not.

The site is approximately 3 miles NE of Pasco WA.

There is a well on the site, one SE of the site and an irrigation well west of the site.

The site was run as a open/burning dump before 1972 and as a sanitary landfill since. The industrial wastes were buried in a separate area. The drums were buried as is and the liquids put in ponds, evaporated and then buried. All the industrial wastes were covered with poly-sheeting before burying. The operation was run under a waste discharge permit (zero discharge) issued by the Washington State Dept. of Ecology.

The Pasco Landfill is approximately 3 miles NE of Pasco Wa.  
There is a well on the site, and approximately nine irrigation wells within a one mile radius.  
From 1955 to 1971, the site was an open-burn dump handling only residential & light industrial waste.  
In 1971, the operation was changed to a sanitary landfill.

Resource Recovery Corp., a Seattle based firm assumed management of the site in 1972. It was during the period from '72 to '74 that the site accepted industrial wastes under a waste discharge permit (zero discharge) issued by the Wa. St. Dept. of Ecology. Continued on other page.

Environmental Protection Agency  
1200 Sixth Avenue  
Seattle, Washington  
Attn: Clerk handling applications for Hazardous Waste Permits

Subject: Hazardous Waste Permit Application, WAT540010089  
Request to Withdraw Application

To Whom It May Concern;

As of January 1, 1981, the sanitary landfill at Pasco, Washington, was transferred to a new company, The Pasco Sanitary Landfill, which is not interested in operating a hazardous waste disposal site. There has been no hazardous wastes accepted at the site since November 17, 1980, when I filed application forms #1, and #3 with you. Attached you will find copies of the applications sent to your agency for reference.

Would you therefore please withdraw the Resource Recovery Corporation's application for a hazardous waste disposal site.

Thank you,

  
John R. Kimberly, Jr., President  
Resource Recovery Corporation

**G Known, Suspected or Likely Releases to the Environment:**

Place an X in the appropriate boxes to indicate any known, suspected, or likely releases of wastes to the environment.

☐ Known ☐ Suspected ☐ Likely ☒ None

**Note:** Items H and I are optional. Completing these items will assist EPA and State and local governments in locating and assessing hazardous waste sites. Although completing the items is not required, you are encouraged to do so.

**H Sketch Map of Site Location: (Optional)**

Sketch a map showing streets, highways, routes or other prominent landmarks near the site. Place an X on the map to indicate the site location. Draw an arrow showing the direction north. You may substitute a publishing map showing the site location.

**I Description of Site: (Optional)**

Describe the history and present conditions of the site. Give directions to the site and describe any nearby wells, springs, lakes, or housing. Include such information as how waste was disposed and where the waste came from. Provide any other information or comments which may help describe the site conditions.

The site is approximately 3 miles NE of Pasco WA.

There is a well on the site, one SE of the site and an irrigation well west of the site.

The site was run as a open/burning dump before 1972 and as a sanitary landfill since. The industrial wastes were buried in a separate area. The drums were buried as is and the liquids put in ponds, evaporated and then buried. All the industrial wastes were covered with poly-sheeting before burying. The operation was run under a waste discharge permit (zero discharge) issued by the Washington State Dept. of Ecology.

**J Signature and Title:**

The person or authorized representative (such as plant managers, superintendents, trustees or attorneys) of persons required to notify must sign the form and provide a mailing address (if different than address in item A). For other persons providing notification, the signature is optional. Check the boxes which best describe the relationship to the site of the person required to notify. If you are not required to notify check "Other".
